PROFESSIONAL SUMMARY

Aspiring Software Engineer and motivated Front-End Developer with a strong foundation in HTML5, CSS3, and JavaScript, currently awaiting admission into the Software Engineering program at the Federal University of Technology, Minna. Demonstrated ability to build responsive, user-centric web applications and interactive administrative portals through hands-on project work and industry training. Passionate about mastering full-stack development and contributing to real-world technical solutions.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (DOM Manipulation, Event Handling)

Tools & Platforms: Git, GitHub, VS Code, Browser Developer Tools

Design & Concepts: Responsive / Mobile-First Design, CSS Flexbox & Grid, CSS Animations, Semantic Markup, Debugging & Problem Solving

EDUCATION

Federal University of Technology, Minna — B.Tech Software Engineering (Applicant)	2026
Awaiting admission decision — application submitted for the Software Engineering program.	
Khaisal Islamic Science Academy — Senior School Certificate Examination (SSCE)	Completed 2025
WAEC — Sat 2025. JAMB (UTME) — Sat 2026.	

FEATURED PROJECTS

AI-Hikmah LMS — Admin Portal	HTML, CSS, JavaScript
- Engineered an administrative portal interface for a full-stack Learning Management System during hands-on training with AI-Hikmah Technologies Services Limited. - Developed control interfaces for managing courses, learning modules, quizzes, assignments, student submissions, and instructor accounts across 13 pages. - Structured semantic HTML components and responsive styling for administrative data presentation.	
Personal Portfolio Website	HTML, CSS, JavaScript
- Designed and deployed a responsive personal portfolio featuring a dark/light theme toggle, mobile drawer navigation, and an animated typewriter effect. - Integrated performance-friendly, scroll-triggered reveal animations using the browser's Intersection Observer API.	
Balo Lee Books	HTML, CSS
Built a responsive front-end catalog layout for browsing books, prioritizing clear navigation hierarchy and structured content grids.	
School Mini Website	HTML, CSS
Built a multi-page institutional web platform featuring interactive contact forms, structured data tables, and seamless site navigation.	
Web Skills Guide	HTML, CSS
Authored a developer reference site providing a structured learning path, practical code tips, and foundational explanations of core web technologies.
